BAR BENDING MACHINE

Sparkline Series of Bar Bending Machine SBM 42/52/55

Advance PLC Control Panel

PLC and safety logic to prevent over travel of bend wheel. Easy fault finding through PLC, Forward and reverse delay time is maintained through PLC for safe operation, bend wheel travel is restricted through PLC to prevent accident.

3 Bending Pre - selction

3 Bending Radius and be pre-set so without removing the locator pin three different degree bend is possible by bend selctor switch. Pre-selection switch makes operation 2 time faster.

Grease Lubricated Gear Box

Advance technology grease lubricated gear box is used. Traditional oil lubricated gear box has high chances of oil leakage. Unlike oil lubricant gearbox there is no need to check lubricant level frequently. Also NO leakage issues.
